EDUCATION

August 2026 - Present	Ed.M, Learning Design, Innovation, and Technology, Cambridge, MA <i>Harvard University</i>
September 2019 - May 2023	BSE, Computer Science, Princeton, NJ <i>Princeton University</i> GPA: 3.71/4.00 Relevant Coursework: Natural Language Processing; Reasoning about Computation; Economics and Computing; Innovating Across Technology, Business, and Marketplaces; Foundations of Psychological Thought

SELECTED PROJECTS

March 2026	"Physics Review" Online Platform Built a self-paced review platform (vibe-coded) enabling high school students to log and track past mistakes for assessment preparation. Piloted with 30 Grade 11 students at United World College, China.
October 2025	"Self-Driving Car" Conceptual Understanding Teaching Experiment Designed a 70-min inquiry lesson using AI-generated scenarios to teach vectors/scalars to 20 Grade 10 students at United World College, China.
October 2024	"Turtle Game" Coding Workshop Designed and delivered an interactive Python fundamentals workshop ("Turtle Game") to 30 Grade 8 students at a Spanish international school in the Seattle area.
September 2023	Automatic Content Translation Model Leveraged OpenAI's LLM to automate translation of 40+ online coding education workshops into 4 languages, expanding global accessibility of educational resources.

RESEARCH EXPERIENCE

June 2021 – November 2021	NLP Research Assistant, Hangzhou, China <i>Westlake University, Deep Learning Lab</i> Contributed to an open-domain empathetic chatbot for mental health support, integrating adversarial testing and expert feedback from 5 professional counselors to improve safety and ethical alignment.
October 2021 – April 2022	Research Assistant, Princeton, NJ <i>Princeton University, Department of Sociology</i> Developed and annotated a dataset of 200+ US social media documents to train a supervised ML model for contextual inference and topic classification in political sociology research.

WORK EXPERIENCE

July 2025 - present

STEM Teaching Fellow, Changshu, China

United World College

Designed and implemented a Concept-Based Inquiry physics curriculum for 150+ Grade 10 students in the IB Diploma preparatory program.

Partnered with school leadership to apply predictive AI analytics to student performance data, generating personalized learning strategies and data-informed instructional improvements.

Mentored 20+ students in physics and computer science, cultivating academic excellence and research interest through hands-on supervision of a physics experiment club.

July 2023 – June 2025

Software Engineer - Azure Monitoring Redmond, WA

Microsoft

Engineered AI-powered automation (KeplerWorkspace) for guided troubleshooting, reducing incident resolution time for 200+ global engineers.

LEADERSHIP AND COMMUNITY SERVICE

September 2023 - Present

AI Project Lead Developer

Neuvo Foundation (Non-Profit Organization formed by Microsoft Engineers)

Engineered an online platform hosting 40+ interactive STEM workshops for virtual and in-person delivery.

Led the AI Automatic Content Translation Model project, expanding workshop accessibility across 4 languages.

Sept. 2023 – Sept. 2024

Early-in-Career Volunteer Representative

Microsoft GIVE Campaign

Facilitated peer-mentoring sessions for early-career engineers.

Coordinated CPR training with local police department for 50+ colleagues.

Sept. 2020 – Sept. 2021

Technology & Internal Communication Team

Princeton Women In Computer Science

Organized recurring mentorship events focusing on students' career planning. Partnered with team members to design and operate the monthly newsletters.

SKILLS

Technical: Python, PyTorch, AI-Assisted Development, Data Annotation, Experimental Design

Design & Collaboration: Canva, MS Office, React, Hugo
